COURSE SCHEDULE

1980

INTRODUCTION

More University is a private educational institution which is open to people of all ages, backgrounds, and points of view. Founded in 1968, More University was created to provide more relevant lives to those who would use its resources. Using the most classic educational modes, More University is a school in the Renaissance tradition, dedicated to realizing the full potential of human beings.

More University was founded with the concept of the perfection of the Universe. This philisophical foundation led to the creation and development of courses designed to utilize all facets of human knowledge and experience. In the tradition of the Greek classicists, our teaching staff has posed the question to ourselves and our students, "Are all limitations self-imposed?" With that question has come a rebirth of transcendentalist enthusiasm for the American way of life and the opportunities that life in this country makes available to every individual.

More University offers a unique educational experience to individuals who are willing to accept great challenges, regardless of their previous educational background. It is the ability to use information that demonstrates the quality of learning, and with that in mind, More University welcomes people who dare to pioneer the frontiers of America's educational future.
